

International Journal of Research and Development in Engineering and Technology

Author's Guideline

➤ About the Journal/Introduction

- The International Journal of Research and Development in Engineering and Technology is an open access journal that provides rapid publication of articles in all areas of Engineering and Technology such as Chemical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Industrial Engineering, Mechanical Engineering are included but not limited to these, in the scope of the International Journal of Research and development in Engineering and Technology. The Journal welcomes the submission of manuscripts that meet the general criteria of significance and scientific excellence. Papers are accepted for publication after peer review. Submit your manuscript through e-mail: ijrd.engineeringandtechnology@dentmedpub.com

➤ Submission of Manuscript

DMP uses a web-based submission and review system. However current manuscript can be submitted at ijrd.engineeringandtechnology@dentmedpub.com. Detailed instructions on how to prepare manuscript can be available at [Author's Guideline \(PDF\)](#). Regardless of the source of the word-processing tool, only electronic PDF (.pdf) or Word (.doc, .docx, .rtf) files can be submitted

- **Peer Review**

All manuscripts are subject to peer review and are expected to meet standards of academic excellence. Submissions will be considered by an editor and "if not rejected right away" by peer-reviewers, whose identities will remain anonymous to the authors.

- **Email confirmation of Submission**

After submission you will receive an email to confirm receipt of your manuscript. Please check your junk/ spam mails carefully and enable for journal mail address. Kindly let us know if you don't receive any mail of confirmation within 7 days.

- **Review Process**

All manuscripts are reviewed by an editor and members of the Editorial Board or qualified outside reviewers. Authors cannot nominate reviewers. Only reviewers randomly selected from our database with specialization in the subject area will be contacted to evaluate the manuscripts. The process will be blind review. However we suggest authors to provide details of potential reviewers to store in data base

Decisions will be made as rapidly as possible, and the journal strives to return reviewers' comments to authors as fast as possible. The editorial board will re-review manuscripts that are accepted pending revision. It is the goal of the IJRDM to publish manuscripts within shortly after submission

- **Article processing charge**

International Journal of Research and development in Engineering and technology is an open access journal. Open access charges allow publishers to make the published material available for free to all interested online visitors. For more details about the article processing charges of International Journal of Research and development in Engineering and technology, please visit the <http://www.dentmedpub.com/ijrd-engineering-and-technology.html> information page.

- **Structure for Publication**

Upon acceptance of the manuscript, please provide a final version (in Microsoft Word file) for copyediting purpose. Figures should be of high quality and high resolution, and can be embedded in the manuscript Word file. If the figures or tables are created using PowerPoint, Photoshop, Microsoft Excel etc, please also provide the original files from those programs.

- **Language**

All submissions must be in English; both British and American spelling conventions are acceptable. Authors for whom English is a second language must have their manuscript professionally edited by an English speaking person before submission to make sure that English is of high quality. It is preferred that manuscript is professionally edited

- **Title page**

The Title should be a brief phrase describing the contents of the paper. The Title Page should include the authors' full names and affiliations, the name of the corresponding author along with phone, fax and E-mail information. Present addresses of authors should appear as a footnote.

- **Abstract**

All manuscripts submitted to IJRDMs should use a structured abstract under the headings: Objectives - Methods - Results - Conclusions. Structured abstracts are preferred for original research and systematic reviews. The abstract should provide the context or background for the study and should state the study's purpose, basic procedures (selection of study subjects or laboratory animals, observational and analytical methods), main findings (giving specific effect sizes and their statistical significance, if possible), principal conclusions, and funding sources. It should emphasize new and important aspects of the study or observations.

- **Materials and Methods**

This part should contain sufficient detail so that all procedures can be repeated. It can be divided into subsections if several methods are described.

- **Acknowledgement**

All acknowledgment of people, grant, funds, etc should be brief.

- **Tables and figures**

Tables and Figures should be numbered consecutively. Citation of tables and figures should use the format: Table 1, Table 2, ... Figure 1, Figure 2, ... (or Fig. 1, Fig. 2, ...). Parts in a figure can be identified by A, B, C, D, ... and cited as Fig. 2A, Fig. 2B, Fig. 2C. The abbreviation of "Table" to "Tab." for example "Tab. 1" should be avoided.

- **Conclusion**

Mentioned clearly the conclusion of the research work carried out and highlighting its importance.

- **Reference**

Authors are responsible for ensuring that the information in each reference is complete and accurate. All references must be numbered consecutively and citations of references in text should be identified using numbers in square brackets (e.g., “as discussed by Smith [9]”; “as discussed elsewhere [9, 10]”). The list of references begins on a fresh page in the manuscript, using the Vancouver format.

➤ **Ethics committee approval and Patient consent**

In any studies that involve experiments on human or animal subjects, the following ethical guidelines must be observed.

I) Human experiments

All work must be conducted in accordance with the Rules. Papers describing experimental work on human subjects who carry a risk of harm must include:

- A statement that the experiment was conducted with the understanding and the consent of the human subject.
- A statement that the responsible Ethical Committee has approved the experiments.

II) Animal experiments

Papers describing experiments on living animals should provide:

- A full description of any anesthetic and surgical procedure used.
- Evidence that all possible steps were taken to avoid animal suffering at each stage of the experiment. Papers describing experiments on isolated tissues must indicate precisely how the donor tissues were obtained.

➤ **Authorship transfer/Copyright**

Please note that at the time of submitting the article, the work described has not been published before (except in the form of an abstract or as part of a published lecture, or thesis) in any publication other than DMP; the authors agree to automatic transfer of the copyright to the publisher if and when the manuscript is accepted for publication

The use of general descriptive names, trade names, trademarks, and so forth in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal are believed to be true and accurate on the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal

responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

➤ Disclosure Policy

Neither the International Journal of Research and Development in Engineering and Technology nor its publishers nor anyone else involved in creating, producing or delivering the International Journal of Engineering and Technology (in any format) or the materials contained therein, assumes any liability or responsibility for the accuracy, completeness, or usefulness of any information provided in the International Journal of Research and Development in Engineering and Technology (in any format), nor shall they be liable for any direct, indirect, incidental, special, consequential or punitive damages arising out of the use of the International Journal of Research and Development in Engineering and Technology.

All material published in the International Journal of Research and Development in Engineering and Technology undergoes peer review to ensure fair balance, objectivity, independence, and relevance to educational need. The editors of the material have consulted sources believed to be reliable in their efforts to provide information that is in accord with the standards accepted at the time of posting. However, in view of the possibility of error by the authors, editors, or publishers of the works contained in the International Journal of Research and Development in Engineering and Technology, neither the International Journal of Research and Development in Engineering and Technology, nor its publishers, nor any other party involved in the preparation of material contained in the International Journal of Research and Development in Engineering and Technology represents or warrants that the information contained herein is in every respect accurate or complete, and they are not responsible for any errors or omissions or for the results obtained from the use of such material. Readers are encouraged to confirm the information contained herein with other sources.
